Allan Karl - Keynote Speaker

Presentation & Audiovisual Needs

What Does Allan Provide?

- Allan will bring his laptop, a MacBook Pro which contains all photography, video and audio for his presentation.
- He uses an Apple IR remote for triggering his presentation.

Audio Requirements

- Wireless clip-on lavalier microphone—Allan often moves about the stage and sometimes in the audience
- Handheld wireless microphone—as a backup and for audience questions and participation, if so desired
- Stereo audio connection to PA/sound system—PA must be able to accommodate computer audio from Allan's laptop -- 1/8-inch stereo mini plug and sufficient cable to connect from laptop to PA/mixer

Video Requirements

- LCD projector and screen—able to accept standard VGA output. Projector should be able to support a minimum resolution of 1024 x 768 and sufficient brightness to operate effectively with both standard and dimmed room lighting.
- There should be sufficient cable length to connect Allan's laptop with the projector.

Other Requirements

- Allan uses an IR (infrared) remote which requires line of sight to his laptop for queuing media. If not possible, Allan will need a USB compatible wireless bluetooth or RF remote transmitter
- Allan will need a small table or platform to place his laptop with access to an electrical outlet to power his MacBook Pro.
- Allan would like a glass of cold water.
